Dear

This letter is in response to your letter of 10 April 1984.

As a concerned citizen, you are no doubt active in one of the two groups that is currently working with us to select an acceptable road improvement program. The McLean Citizens Association and the Ad Hoc Committee for Traffic to/from CIA both have representatives on the CIA Traffic Advisory Committee. This Committee also contains representatives of Federal, State and County Governments.

Through the Committee, we are trying to ensure that there is common understanding of the problems, concerns, and possible design solutions associated with the CIA sponsored road improvements. Community concerns expressed by your representatives are discussed and presented to the design consultant so that he can develop designs that reflect sensitivity to the issues. When a design is finally selected, it will be constructed to established standards of the Virginia Department of Highways and Transportation. One of the major goals of these standards is to provide safety to the users of the road.

While we cannot yet point to the design that will be constructed, we can say that the process of reaching that decision is sensitive to concerns such as yours.

Sincerely,

/s/ Larry K. Myers

Larry K. Myers
Chairman

CIA Traffic Advisory Committee

OL 2053-84
